PROJECTS

Bakery Link

Project Link: <https://bakerylink.herokuapp.com/> Github: <https://github.com/aymzki/finalproject>

- Bakery Link is a web application that will make ordering custom cakes and baked goods ... a piece of cake! It is a full-stack MERN application that allows customers to order custom cakes and baked goods. Bakeries can use it to manage orders and keep track of inventory in an online database.
- Roles: Frontend and Product Design
- Built with: JavaScript, HTML, CSS, Bootstrap, React, Express, Node.js, MongoDB, Mongoose, MapQuest API, Plotly.js, Moment.js, React Responsive Carousel

Your Team Manager

Project Link: <https://your-team-manager.herokuapp.com/> Github: <https://github.com/aymzki/getrecd>

- An app to let rec league players keep track of their stats, teams, and leagues. They can also join teams or create their own teams and leagues.
- Roles: Frontend, Forms and Modals, Design, Javascript animation research.
- Built with: JavaScript, jQuery, Chart.js, SQL, Sequelize, Node.js, CSS, Bootstrap, HTML, Handlebars

wEATherly

Project Link: <https://xatgomezstudio.github.io/project-weatherly/> Github: <https://github.com/aymzki/weatherlyapp>

- A web application that generates recipes and beverage suggestions based on your weather/location.
- Roles: Git master, regulating all merges and pull requests, Weather API, Validation code.
- Built with: jQuery, Javascript, APIs, AJAX, JSON, Bootstrap, CSS, HTML, Materialize
